Gary,
Kevin came by and mentioned that the SEMS schedule for San Jacinto was not showing a ROD. I went back to the Primavera working file and checked it and it does have a schedule for the Proposed Plan and ROD. I am going to republish it and see if anything goes through this time. I believe we need to wait 24 hours to make sure everything is processed. We can check it tomorrow afternoon and see what is missing. CAS

Thanks Carlos. I think I understand the scheduling part, but could use some help on the financial part and on entering site information (like 5-year review info, etc.)

Subject: Primavera Help

We are working with HQs to arrange help with Primavera.
We will schedule session in groups or individually.
Please let me know if you need help and the type (general or specific) of help that you need. CAS
